

Chronic Brain Injury Program

Peer Review for Extramural Proposals Workshops

The Chronic Brain Injury (CBI) Peer Review for Extramural Proposals Workshops (PREP-Work) series is a regular opportunity for CBI Faculty Affiliates to solicit and receive feedback on grant proposals in development. This program provides an interdisciplinary review from senior and junior faculty to improve successful capture of research funding.

Process

Each semester (see dates below), CBI convenes a team of Ohio State faculty to review new and revised proposals expected to be submitted to extramural sponsors in the next year. Applicants may request a review by completing the form at <https://go.osu.edu/cbiprepwork>. CBI staff will review requests and assign them to an upcoming review session. CBI Faculty Affiliates are encouraged but not required to participate in these workshops.

Each review will be completed in two parts:

1. The reviewers will independently review the submitted form materials and provide written feedback.
2. Applicants will meet with the reviewers to present an overview of the proposal and research strategy, including any preliminary data. Applicants will have 7 minutes to present and may use slides. The reviewers will provide oral feedback following the presentation.

CBI staff will work with PREP-Work participants to schedule reviews, provide information, track proposal submission outcomes, and identify additional opportunities for proposal support and funding.

Eligibility

Applicants: Proposals must include at least one CBI Faculty Affiliate. Preference for review spots will be given to junior faculty, and team proposals featuring:

- A cross-disciplinary collaboration featuring at least two Ohio State colleges OR
- A translational collaboration between basic and clinical scientists OR
- A transdisciplinary collaboration involving an external partner organization.

Scope: Proposals must address chronic brain injury topics in one or more of CBI's key areas: translational neurotrauma research, treatment and prevention interventions, or detection and data systems. Preference for review spots will be given to: proposals for federal project, program, or center proposals; proposals resulting from other CBI funding mechanisms; proposals which previously were submitted but not funded.

Sponsors: Proposals must respond to federal, industry, or foundation funding announcements. Preference for review spots will be given to proposals targeting National Institutes of Health and Department of Defense funding programs, as well as industry sponsors.

REQUEST DEADLINES

SPRING 2022	DECEMBER 13, 2021
SUMMER 2022	APRIL 18, 2022
AUTUMN 2022	AUGUST 24, 2022
