## NeuroTrauma Research In Progress Seminars

Presented by Center for Brain & Spinal Cord Repair and Chronic Brain Injury Program

***“Understanding the neurodevelopmental effects of football-related neurotrauma across first year of tackle football participation”***

**Jaclyn B. Caccese, PhD** | Assistant Professor | School of Health & Rehabilitation Sciences

**Zeynep Saygin, PhD** | Assistant Professor | Psychology | Cognitive, Developmental

Jaclyn B. Caccese, PhD

Continued media coverage of the potential long-term effects of contact sports, such as tackle football, has created significant public health concerns about the risk of childhood participation. In this talk, we will discuss preliminary data quantifying repetitive head impacts in youth tackle football and the effects of these head impacts on neurodevelopment.
