

Gather.Town Resources

Our Research Day poster session will use [Gather](#), an interactive platform that combines video conferencing, file sharing for PDF posters and discussion socials, and 8-bit gaming. We hope to make this a fun and immersive experience. Through this set up, posters will be live judged, and discussion sessions can be held ad-hoc in a variety of locations. ****Gather.Town works best with a Chrome browser, as their Safari is a beta-version. For the smoothest experience, we recommend using Google Chrome if possible.**

- [Gather.101 – How to Move and Explore](#): **FOR ALL VISITORS AND PARTICIPANTS**
 - how to set/change your name
 - how to view video calls
 - how to use video/audio settings
 - how to use the messaging system
- [Screen-Sharing](#): **FOR ALL POSTER PRESENTERS**
