

Buckeye Neurotrauma Lectures

Neurotraumas like traumatic brain injury and spinal cord injury affect over 25% of Ohioans. Buckeye Neurotrauma Lectures is an open series sponsored by Ohio State's Chronic Brain Injury Program and Center for Brain & Spinal Cord Repair to share our research with the public. Clinicians, trainees, and survivors of brain injury around the world are welcome to learn in-person, online, or watch recordings on our YouTube channel.

“Flexible, Miniaturized Sensing Probes Inspired by Biofuel Cells for Monitoring Synaptically Released Glutamate in the Mouse Brain”

Jinghua Li, PhD

Assistant Professor, Materials Science and Engineering

Dr. Li is the 2023 Ohio State Early Career Innovator of the Year and the 2023 CBI Paper of the Year Winner.

Chronic Brain Injury Program | cbi.osu.edu

Friday, May 17, 2024, 9:30 | In-Person: 400 Prior Hall or Zoom – Register: <https://go.osu.edu/buckeyeneurotrauma>
