

Buckeye Neurotrauma Lectures

THE OHIO STATE
UNIVERSITY

WEXNER MEDICAL CENTER

“Opioid-induced postoperative cognitive dysfunction in aging: long-term effects on neuronal structure & function”

Ruth M. Barrientos, PhD

Associate Professor, Department of Psychiatry and Behavioral Health

Dr. Barrientos will discuss how opioids, surgery, and aging come together to potentially activate TLR4 and set some long-term hippocampal changes in motion to cause memory impairments in aged rodents.

1 CME or 1 Nursing CEU credits are available

If you need an accommodation to access the presentation or presentation materials, email us: cbi@osu.edu
