"Developmental consequences of mild traumatic brain injury: neonatal mouse models"

Rachel Corrigan, PhD
Postdoctoral Research Scientist | Institute for Genomic Medicine | Abigail Wexner Research Institute
Nationwide Children's Hospital | Dr. Tracy Bedrosian Lab

In this talk I will be characterizing post-injury mechanisms and pathology of various models of closed-head traumatic brain injury in a crucially underrepresented population pre-clinically: neonatal mild injuries. Here I will be evaluating different forces of mild injury and determining the threshold for certain secondary mechanisms of injury and the impact on critically-timed brain developmental milestones.
